

How to Calculate your Carbon footprint

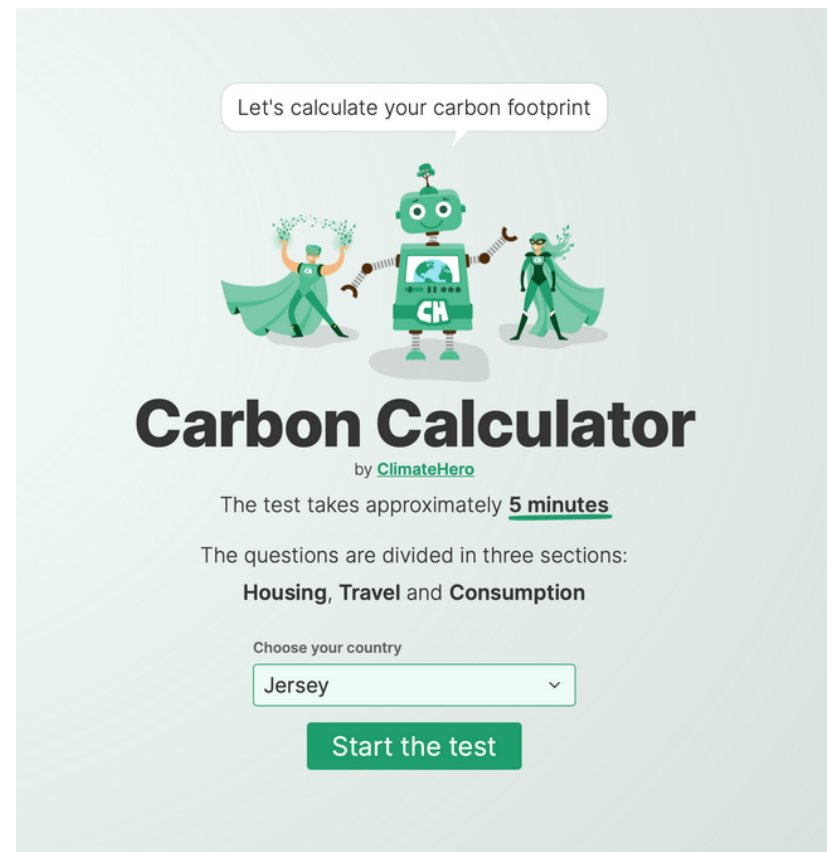

and reach

<https://carbon-calculator.climatehero.org>

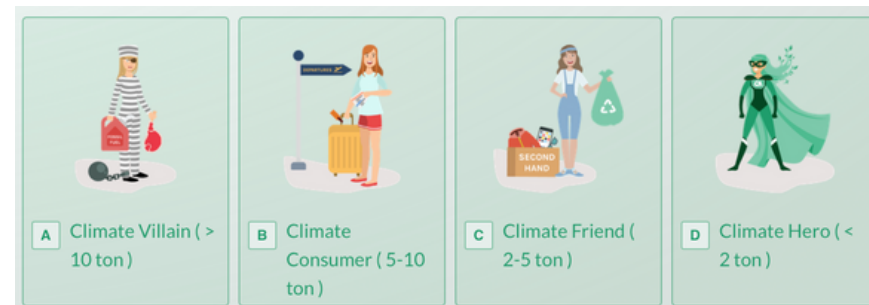

Start the **Climate Hero** test - it takes about 5 minutes

make sure you set the country to JERSEY
then follow the prompts
filling in your name and answering the
questions as you go along.

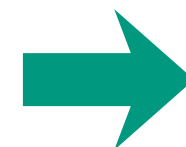

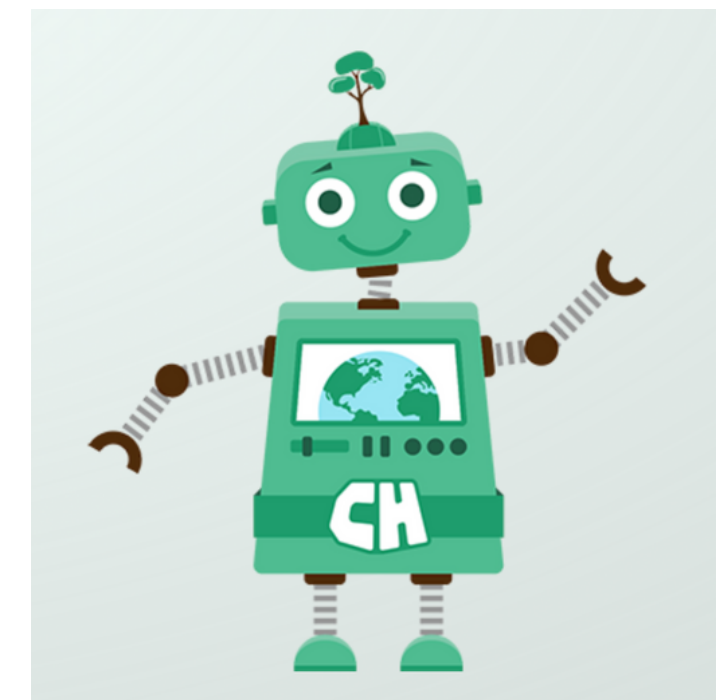

This is a screenshot of a question from the Climate Hero test. The question is "9 → Does your household use carbon free electricity?" with a subtext: "Meaning that your electricity contract excludes fossil fuels. Your electricity comes from from wind, solar, hydro, geothermal or nuclear power." There are three radio button options: "A Yes" (which is selected and has a green checkmark), "B No", and "C Don't know". A green "OK" button is at the bottom.

Question nine - make sure you
select option A as 95% of
Jersey's electricity
comes from hydro or nuclear

Find out your carbon footprint.
Are you a hero or a villain?

Climate Hero will suggest ways you can
reduce your carbon footprint
or you can choose to offset
your carbon footprint

This screenshot shows the "Offset your remaining footprint!" section. It includes a subtext: "Take responsibility for the carbon emissions you can't avoid by supporting projects that accelerate climate transition." Below this is a carousel image of wind turbines with the text "India Wind Power" and a "Learn more" button. At the bottom, there are two radio button options: "A Yes" and "B No, I'm not ready".

This is a good carbon
calculator
for the whole family to use
